

# ENGINEERING COUNCIL OF SOUTH AFRICA

Cyril Gamede

**ECSA President**

## **Leadership & Industry Integration/Engineering Collaboration**

06 March 2018

ECSA's role is important as it regulates the profession of engineering in the public interest through the following specific functions:

- Develop internationally benchmarked and recognised standards for the different registration categories;
- Enter into international agreements for the recognition of educational standards and registration;
- Accredite Engineering programmes in different institutions of higher learning

- Register persons who meet educational requirements in candidate categories;
- Register persons in professional categories who demonstrate competency against the prescribed standards for the different categories;
- Establish specified categories of registration to meet health and safety and licencing requirements and register persons in such categories;
- Monitor the renewal of registration by registered persons.

- Develop and maintain a code of conduct, supported by codes of practice;
- Investigate complaints of improper conduct against registered persons and conduct enquiries and impose sanctions as each case requires; and
- Recommend to the Council for the Built Environment (CBE) ECSCA's identification of the type of engineering work which may be performed by persons registered in any of the categories referred to in section 18 of the EPA

# How does ECSA Regulate

```
