

GROWING OUR OWN TIMBER

A Youth's Perspective

Tevan Govender, Pr Tech Eng

Senior Civil Technologist, Knight Piésold (Pty) Ltd

CESA YPF KZN Chairperson

21 September 2021

GROWING OUR OWN TIMBER...

- ◆ 1) ...As an Individual
- ◆ 2) ...As a Company
- ◆ 3) ...As an Industry

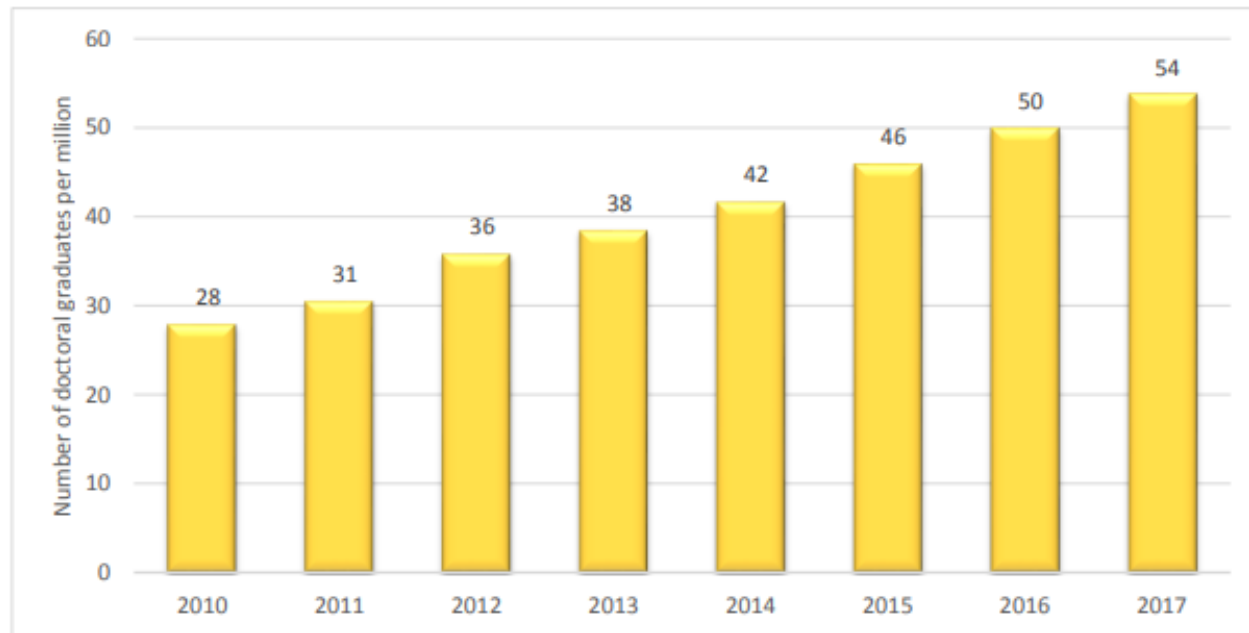

01 Grow our own timber as an individual

- ◆ Are you happy or just content?
- ◆ In-service training
- ◆ Professional registration
- ◆ Research

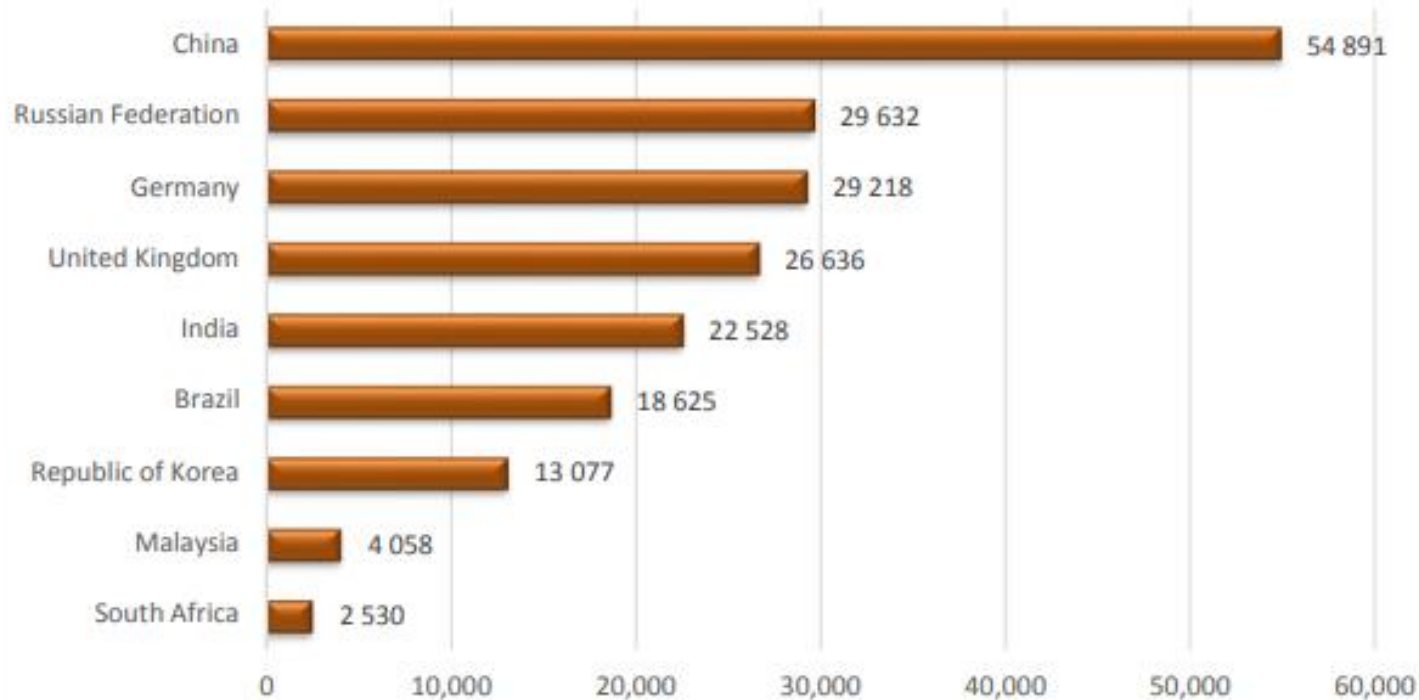

Figure 1: Number of doctoral degree graduates per million of population per year, 2010 - 2017

Sources: own calculations based on Statistics on Post-School Education and Training in South Africa, 2017 (DHET) and Mid-year population estimates 2018 (Statistics South Africa)

Note: The number of doctoral graduates per million of population per year is calculated by dividing the total number of doctoral degree graduates in a given year by the number the persons in the population in the same year and multiplying the result by 1 000 000.

2015

Source: UNESCO Institute for Statistics. Extracted 22 January 2020 from UIS.Stat.

01 Grow our own timber as a Company

Invest now to be better in the future.

Mentorship and bridging the knowledge gap.

Upskill your current staff and grow them into the tree that can bear you fruit.

01 Grow our own timber as an Industry

Private consultants and public entities need to work together to start the infrastructure movement.

Many professionals, young and old, are starting to move abroad.

let's
talk

Almost done...

- ◆ Next time I would like CESA to let me have my own event so that I can speak for longer than 10min and we can come up solutions to many challenges we are facing.

Thank you
