

2022 CESA INDABA RESOLUTIONS

Conference action items for members/individuals and CESA

- Infrastructure
 - There is a need to transform the country's Infrastructure.
 - Transformation must deliver social value
 - Engineers must actively contribute to the National Infrastructure Plan 2050, or rebuild project
 - Optimize impact of engineering services and projects – poverty, inequality, unemployment
 - Engineers need to have new skills to be involved in ESGs
 - Prioritisation of O&M
 -
- Inclusive Economic participation
 - Infrastructure development should prioritise input by women, youth, and people with disabilities to ensure we deliver infrastructure that is diverse and inclusive.
- Leadership
 - Encourage Young Professionals participation on CESA Indaba as speakers
 - Growing our own timber
 - Encourage graduates to become specialists
 - Engineers must be role models
 - Loss of key skills due to unfavourable infrastructure south African environment
 - De-politicise recruitment of public officials
 - Education needs reform
 -
- Advocacy.
 - Advocacy to government in addressing pressing issues.... project pipelines/unblocking project, procurement options
 - Working to be at all infrastructure-related tables
 - Active and effective advocacy – decision makers and politicians – National Treasury
 - Partnership with SALGA and IMESA
- Procurement
 - Drive toward reforming the procurement system that is not political and more transparency in procurement process
 - Continue to advocate for QCBS and Value for Money
 - Push for a regulatory body of procurement in government
- Stakeholders
 - Inclusion of SAICE/SAIEE/SAIMECH in enforcing change
 - Bring media and civil society to the procurement process
- Regulate
 - ECSA & CIDB to regulate industry to protect public

- Future proof engineers to keep them in the engineering and built environment industry
- Anti-corruption
 - All act to prevent corruption
