Future Now!**

**9 & 10
March**

Durban ICC, KwaZulu-Natal

SESSION 5: Leadership and Technology

Exploring augment reality

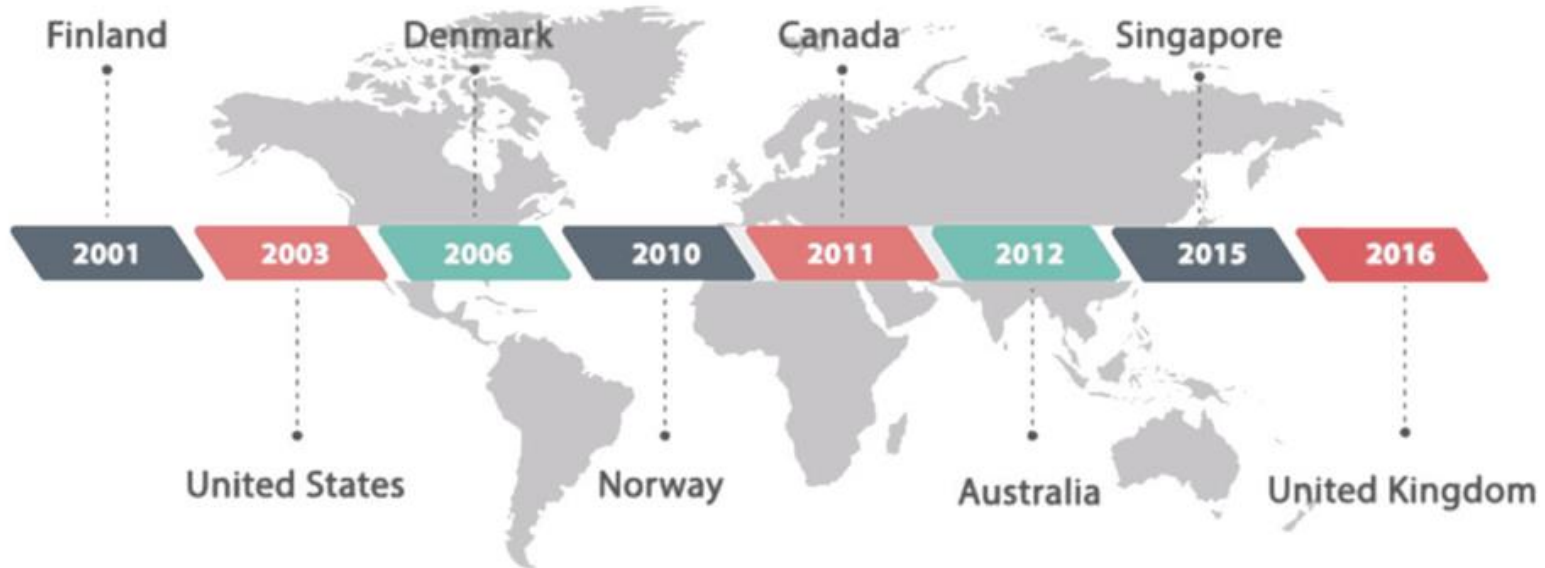

Sikhulile Nhassengo
Director Maninga Engineering,
CESA Technology and Engineering Innovation Forum
Committee Member

Technology Required to sustain growth

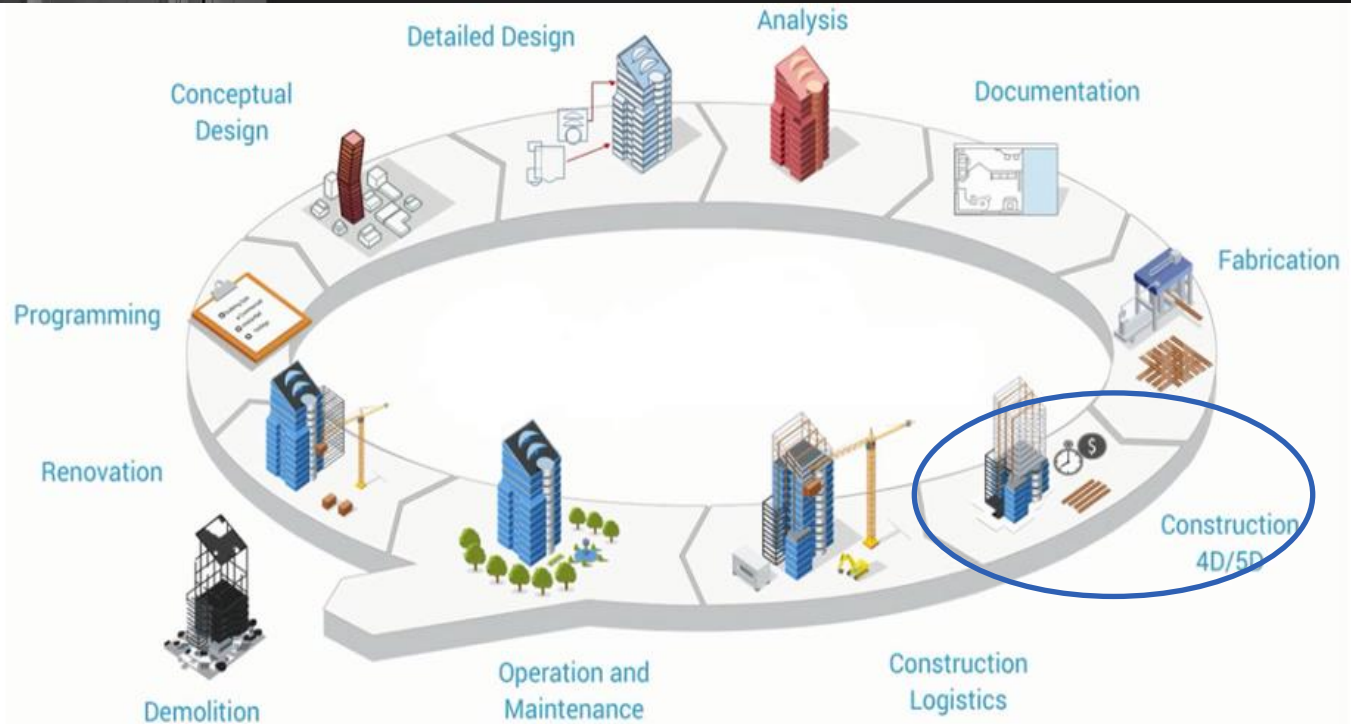

Building Information Modelling

- BIM is a set of technologies, processes and policies enabling multiple stakeholders to collaboratively design, construct and operate a Facility in virtual space
- The construction industry in Africa is slow to adopt the BIM process despite its numerous advantages.

Building Information Modelling (BIM)

- The drive towards Sustainable Building Design and High Performance in buildings is significantly growing.

BIM – Structure / Process Flow

Figure 1. BIM Workflow (TheConstructor.orgby, Carol Dunn March 3, 2022)

BIM – Software

BIM – Collaboration Software

Application of Augmented Reality

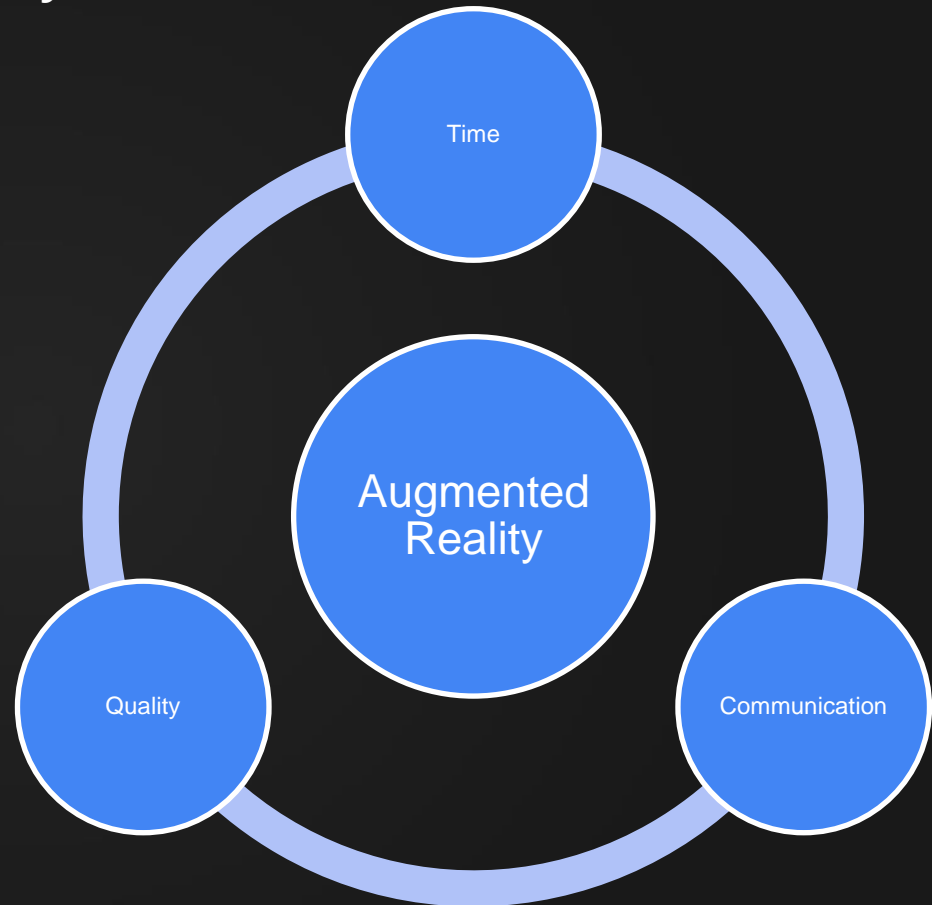

Burns Unit Project

The facility that treats people who have suffered severe burns and functions as a referral hub.

Also offers crucial training for all healthcare workers who have suffered severe burns.

Augmented Reality

Key Focus Area

**Site Inspection – Actual construction versus
Augmented reality**

Engineers at Site

Project Engineers
analysing the model for
potential clashes

**Site Inspection –
Actual
construction
versus
Augmented
reality**

Water supply piping connections

**Site Inspection – Actual construction
versus Augmented reality**

Water supply line passing through Column

Lining up cassettes to the pillars

Site
Inspection –
Actual
construction
versus
Augmented
reality

**Site Inspection – Actual construction
versus Augmented reality**

Clash detected with supply air being distributed on the staircase
