Way Forward

1. Champion professional integrity
2. Design for the people
3. Become leaders of our own careers
4. Commit to lifelong learning and collaboration

Farewell Message

- We are not just building infrastructure; we are building our legacy.
- Our work is about more than just numbers and designs; it is about creating a future that is not only well-engineered, but deeply human.
- The path ahead is ours to create. It requires us to make our future, not simply let it happen to us.
